Noah Buchanan

Atlanta, GA | BuchananNoah100@gmail.com | NoahBuchanan.com | Linkedin.com/in/Noah-Buchanan

Education

Georgia Institute of Technology **Atlanta, GA**
Bachelor of Science in Computer Science *Aug 2024 – May 2028*

Technical Skills

Languages: Java, Python, TypeScript, JavaScript, HTML/CSS
Frameworks / Libraries: Django, Tailwind CSS
Cloud / DevOps: AWS Fargate , ECS, DynamoDB, EventBridge, CloudWatch, CloudFormation, AWS CDK, Docker

Experience

Amazon Web Services (AWS) – Simple Storage Service (S3) **Seattle, WA**
Software Development Engineer Intern *May 2026 – Aug 2026*

- Delivered operator-tooling parity between two parallel systems by bringing existing diagnostic tools from the first system to the other which had a completely different backend architecture.
- Designed and built the CDK infrastructure and deployment pipeline, integrated ECS compute, Cloudwatch logging, and cross-team dependencies across 6 beta regions.
- Ported over complex operator workflows by remapping service dependencies, APIs, and tool logic while maintaining existing operator-facing behavior. Reduced operator burden by eliminating 30 minute ad-hoc manual investigations.

Amazon Web Services (AWS) – Simple Storage Service (S3) **Seattle, WA**
Software Development Engineer Intern *May 2025 – Aug 2025*

- Migrated an internal service to AWS Fargate by modifying AWS CDK infrastructure to support containerized workloads.
- Implemented Fargate packaging and transitioned complex application logic, integrating Amazon EventBridge rules, Docker container overrides, and Guice dependency injection.
- Supported S3's third-largest fleet while deprecating legacy services to reduce patching burden and improve team agility.

Projects

LockIn – Productivity SaaS *2024*

- Built a desktop distraction-blocking app with a tamper-resistant architecture designed to prevent users from bypassing restrictions even through system overrides.
- Integrated through an Electron frontend with Python services blocking distractions and Django licensing backend.

Daily Picture Aligner *2024*

- Designed and implemented a Python image-alignment algorithm using facial landmarks and trigonometric transformations to automatically normalize the rotation, scale, and positioning of thousands of selfies.
- Open-sourced the tool on GitHub, attracting community usage, engagement, and user donations.

Leadership & Awards

Project Inspire Technology **Rockdale ,GA**
Founder *Jan 2022 – May 2024*

- Founded and led a STEM outreach program teaching Python, computer fundamentals, and hardware concepts to elementary and middle school students.

OpenCV International AI Competition — Popular Vote Finalist; Top 20 Projects Award *2023*

Interests

Long-Distance Running, Guitar / Music Theory, Lifting, Video Editing, Rock Climbing, Barbering
