Education

- Georgia Institute of Technology, College of Computing Aug 2024 – May 2028
 - Rockdale Magnet School for Science and Technology (RMSST) Aug 2020 – May 2024
- Weighted GPA: 4.77

Work Experience

- Amazon Future Engineer Intern** June 2025 – August 2025
- Solo Freelance Web Developer: Rockdale Magnet Fund Website** June 2024 – Aug 2024
 - Entirely revamped Rockdale Magnet School's fund website. Designed, developed and deployed from scratch in HTML, Tailwind CSS, and JS (RockdaleMagnetFund.org).
- Solo Freelance Web Developer: Rockdale Career Academy Car Show Website** February 2024 – March 2024
 - Designed, developed, and deployed a website for my school's car show (RcaCarShow.com).
- Rockdale County Government Technology Services Intern** August 2023 – May 2024
 - Worked with multiple departments to learn, help, and provide creative solutions.
- Rockdale Career Academy (RCA) IT Apprentice** August 2021 – May 2023
 - Worked directly with the head of Intel on various related projects (repair, deployments, etc.).

Leadership Experience

- Project Inspire Technology** Jan 2022 – May 2024
 - Founded an initiative to introduce elementary school students to basic computer hardware and software, with the goal of getting them excited and curious about computers.
 - Worked in collaboration with RMSST's and CJ Hicks's school administrations and taught 4th and 5th graders Python and computer hardware, using interactive hands-on teaching.
 - Expanded lessons to General Davis Middle School, teaching 6th graders Python over one school year.

Coding Projects (Source Code on GitHub)

- LockIn:** Founded and developed a productivity SaaS designed to block distractions (www.Lockin.now). 2025
- Portfolio Website:** Designed, developed, and deployed, my personal website (www.NoahBuchanan.com). 2023
- Daily Picture Aligner:** Python script aligns thousands of selfies automatically. 2019 – 2024

Research Experience

- Bridging The Education Gap: Using Django to Inspire Technology** (Source Code on GitHub) 2023
 - 11th grade: Created a programming education web course using Django for students. Teaches programming basics and applies them in a real-world language, Python. Includes user authentication and dynamic content pages. Received Grand Champion award: selected to advance to Georgia Science and Engineering Fair (GSEF), National Student Innovative Award & chosen to travel to IL for NCSSS Research Conference, and 1st Place at the Rockdale Regional Science and Engineering Fair.
- The Effect of Facial Recognition on Racial Bias.** (Source Code on GitHub) 2022
 - 10th grade: Investigated racial bias in a facial recognition model using Python and large image databases. Utilized tools such as Python, OpenCV, NumPy, Matplotlib, Google's MediaPipe facial recognition solution, and large image databases (10,000+) to gather data and generate numerical scores, ran trials and performed "big-data" analysis.

Awards and Honors

- Georgia Institute of Technology Stamps Scholarship Semifinalist. 2024
- OpenCV International AI Competition: Popular Vote Finalist | Top 20 Projects Award. (Source Code on GitHub) 2023

Skills

- Python | Django | Tailwind CSS | Java | JavaScript | HTML/CSS

Interests

- Long-Distance Running, Guitar/Music Theory, Rock Climbing, Barbering, and 한국어 배우기.
